Technical support: Creating a white ink channel with Adobe Photoshop from Graycale images.

This document provides instructions for creating a white ink channel in Adobe® Photoshop from Grayscale images.

Let's get started:

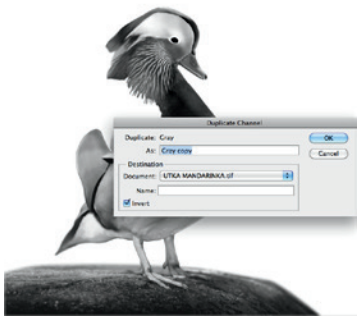

Open your CMYK/RGB or GrayScale image with Adobe Photoshop.

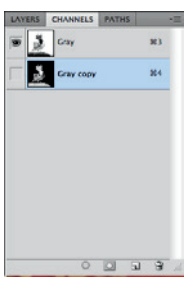

- If the image is in the CMYK or RGB colorspace, convert it to grayscale: On the Image menu point to Mode, and then click grayscale.

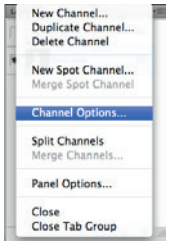

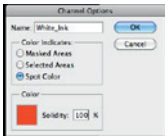

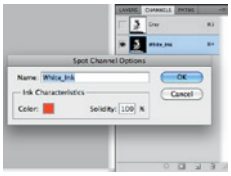

- On the Channels pod, right-click the image and Duplicate the channel.

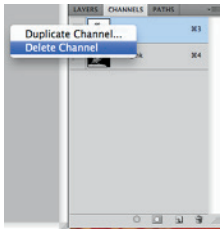

- In the Duplicate Channel dialogue box, click "Invert". Then click OK. An inverted copy of the grayscale image is being created.

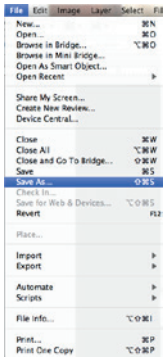

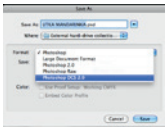

- Channel Options: Name: White_Ink as Spot Color

- Select, right-click and delete the original Gray Channel or drag the Gray channel to the bin.

- File, Save as: DCS2.0 EPS format, Single File, Binary.

EFI fuels success.

From Fiery to superwide inkjet, from the lowest cost per label to the most automated business processes, EFI has everything your company needs to succeed. Visit www.efi .com or call 0808 101 3484 or +44 (0)1246 298000 for more information.
