

## RELEASE NOTES

EFI™ is pleased to announce the release of Fiery® proServer for Cretaprint® 1.5. This latest release is available free of charge to all customers who have their Fiery proServer for Cretaprint covered under an EFI Software Maintenance & Support Agreement (SMSA).

### **Highlights:**

- Color – New CMYK+spot color editing workflow
- Color – Dynamic black reduction for improved color balance and control
- Productivity – Performance gains for color conversion processing
- Usability – Enhanced General tab for quick access to commonly used options

### **Color Quality Improvements:**

- A new CMYK+spot color editing workflow now compliments the existing vRGB editing workflow, designers can choose vRGB or the new CMYK+spot editing workflow depending on their preference or skillset.
- Dynamic black reduction is now available for better image reproduction of lighter designs. Black reduction also aids the editing of the non-black channels due to the resulting increased data in these channels providing finer tuning and therefore superior results.

### **Productivity Improvements:**

- User will see up to a 30% increase in color file conversion performance.
- Support for multi-job processing simultaneously for faster throughput of jobs.
- Server enhancements provide improved stability and performance for client/server communication.

### **Usability Improvements:**

- The General tab has been enhanced to display job settings that are commonly used for easier selection of these job specific options.
- There are new icons in the Job Explorer for Proofing, Produced and Edit in Photoshop for easier navigation.
- The Fiery Image Editor is now integrated into the Fiery proServer client for convenient opening of print ready files for visualization of the production tile.
- Patch color names are now available within the Calibration Tool for easier identification.
- Full support for Simplified Chinese characters for profile names is now available.
- Various interface improvements for easier navigation and clearer feature identification have been implemented.

**Fiery proServer for Cretaprint 1.5 system information:**

Fiery proServer server configuration:

- EFI Fiery proServer for Cretaprint hardware, preinstalled with Windows 7 (64-bit)
