1. Overview

These are the release notes for SignLab update 11.1. This version contains a significant number of requested fixes and improvements.

2. New features included in this release

- Added driver support for the GCC Jaguar V 163 and 163XL cutters.
- Added driver support for the GCC RX II Vinyl Cutter series.

3. Changes and improvements included in this release

- Improved the visibility of some icons in dark mode.
- Added the ability to toggle the Move to Center process in the Fit to Shape SmartBar.
- Arrow keys can now be used and held down to quickly adjust cell values.
- Added a close button to the Tile Clip SmartBar.
- Updated the General Preferences UI to better relay the Polyarc / Polygon / Bezier checkbox setting affects Weld settings.
- Adjusted how thick lines in PDFs are imported to improve the results of the import.
- Improved the visibility of scrolls bars.

4. Fixes included in this release

- Fixed an issue that would occur with Fit Text to Arc when multiple lines of text were present.
- Fixed an issue where Fit Text to Path would not format correctly when applied to a circle.
- Fixed an error that occurred when attempting to output to Versaworks when “Only Output Rhinestones” was enabled.
- Fixed a crash that occurred when saving a file in the Storage Bin.
- Fixed an issue where zoom preferences would not work correctly with multiple instances.
- Fixed an issue where the vectorization preview would not zoom to show the selected area of a bitmap.
- Fixed an issue where some corners in DXF files would not import correctly.
- Fixed an issue where workspace color tooltips were displaying incorrect color values.
- Fixed an issue where the workspace would change to black after exiting the cut state.
- Fixed an issue where the Fit to Circle transformation was not applying as expected.
- Improved the visibility of Soft Shadow in the Effects Catalog preview.
- Fixed an issue where the transformation state would recall the last used transformation regardless of object selected.
- Fixed an issue where certain transformation tools would not apply to the selected object.
- Adjusted the Tile Clip SmartBar to no longer show the incorrect number of active tiles if none were active.
- Fixed an issue where control nubs would not appear in the correct location on a transformed object.
- Fixed an issue where the Rubber Stamp tool would not work correctly if an object was drawn later in the process.
- The pattern fills directory now saves correctly.
- Fixed an issue where users could incorrectly select and modify text when using the Barcode Productivity Module.
