Supported OS

- Windows 64

Color Mode

- CMYK Contone
- RGB

Ink Configuration

- Canon imagePROGRAF Pro series

  - LUCIA TD 12 color inks

Supported media tray

- Canon imagePROGRAF Pro series

  - Roll Paper (Auto) Automatic roll switching is available if a second roll tray is installed.

  - Roll 1

  - Roll 2 (Option)

  - Manual tray

First Steps

Fiery XF needs a valid connection to the imagePROGRAF printer, this could be a network or USB connection. As soon as the port is set up correctly and the printer is online, Fiery XF will download the media information from the printer.
Troubleshooting

- Double check if the port settings are correct and the printer is power on and not in sleep mode.
- The communication and data loading from the printer will need some time. Wait for at least 2 minutes for network connection and up to 5 Minutes for USB connection.
- The media information will only read once at application start time. To trigger a rescan of the media list please press the "Test" button.
- Finally, if all doesn't help, please restart the Fiery XF server.

## Special printer settings

- Cutting modes

  Only supported for roll media.

- Borderless printing

  All user defined sizes will allow borderless printing.

- Output method

If Save data before printing is on, then printer will save the job in HDD before printing.
